問題 01 ※下線部を和訳 <出典：Martin Luther King Jr., in his 1963 speech>

And so even though we face the difficulties of today and tomorrow, I still have a dream.

It is a dream deeply rooted in the American dream.

I have a dream that one day this nation will rise up and live out the true meaning of its creed: “We hold these truths to be self-evident, that all men are created equal.”

問題 02 ※下線部を和訳 <出典 : Martin Luther King Jr., in his 1955 speech>

There comes a time that people get tired. We are here this evening to say to those who have mistreated us so long that we are tired – tired of being separated and humiliated, tired of being kicked about by the brutal feet of oppression. We had no alternative but to protest. For many years, we have shown surprising patience. We have sometimes given our white brothers the feeling that we liked the way we were being treated. But we come here tonight to be saved from that patience that makes us accept not having freedom and justice.

<Vocabulary & Expressions>

mistreat	humiliate
brutal	oppression
no ~ but to do	alternative

問題 03 ※下線部を和訳 <出典：2006 年 上智大学 2 月 7 日>

Current trends in higher education place an ever-increasing emphasis on the written assignment as a means of assessment, and many students find it difficult to cope. As a university lecturer, I see people practically every day who are terribly distressed because they simply don't know how to deliver what their tutors want from a piece of written work.

The fact that the majority of students now pay for their education themselves means that not achieving the grades they need (or their parents expect) can lead to a sense of guilt, low self-esteem, and frustration.

<Vocabulary & Expressions>

current	trend
emphasis (on A)	as a means of A
assessment	practically
distress	deliver
self-esteem

問題 04 ※下線部を和訳 <出典：2017 年 大阪大学 前期>

The advantage of the scientific approach over other ways of knowing about the world is that it provides an objective set of rules for gathering, evaluating, and reporting information, such that our ideas can be refuted or replicated by others. This does not mean that intuition and authority are not important, however. Scientists often rely on intuition and assertions of authorities for ideas for research. Moreover, there is nothing wrong with accepting the assertions of authority as long as we don't accept them as scientific evidence.

<Vocabulary & Expressions>

advantage over A	objective
refute	replicate
intuition	authority
assertion	as long as ～

<和訳>

問題 05 ※下線部を和訳 <出典：2007 年 一橋大学 前期>

There is an idea current in the prevailing culture that writing about something that pains
you heals the pain. I was not, when I began writing my life story, and am not now, healed of
my mother. But you do gain a small distance from anything by keeping it in suspension in
your mind while you work at finding the words to fit it. The process is so slow that you don't
notice its effect, but the point is that it is a process.

<Vocabulary & Expressions>

current

prevailing

heal O of B

suspension
